SKILLS

Languages	Kotlin, Java, JavaScript, SQL
Android	Android SDK, Jetpack Compose, Kotlin Multiplatform, MVVM/MVI & Clean Architecture, Kotlin Coroutines & Flows, Canvas API, SQLDelight, Room, SQLCipher, AppSearch, WorkManager, Retrofit, OkHttp, gRPC, Protobuf, Dagger, Hilt, Koin, MockK, JUnit
Tools	Android Studio, Gradle, Git, CI/CD, ProGuard/R8, Perfetto, Baseline Profiles, Macrobenchmark, LeakCanary, Firebase

EXPERIENCE

Zoho Corporation – Member Technical Staff Android — Feb 2024 – Present

- Core Android engineer on **Arattai Messenger** (20M+ downloads, #1 ranked on Google Play India), a privacy-first messaging platform serving millions of MAUs.
- Optimized app cold-start time by **40%** via Baseline Profiles, Macrobenchmark instrumentation, lazy initialization and startup trace logging; eliminated ANRs in media sync, chat import and audio playback, and resolved memory leaks using LeakCanary.
- Contributed to end-to-end encryption using the **Signal protocol**; integrated multi-device E2EE with primary/companion session management and recovery code generation.
- Built **E2EE backup and restore** over Google Drive with resumable chunked uploads, WorkManager scheduling, push-triggered device-to-device message transfer via a duplicate-safe queue with acknowledgements.
- Extended message search to E2EE chats using **Android AppSearch**, building an on-device indexing layer with regex tokenization and a filter query language for offline full-text retrieval.
- Led Android delivery of **Arattai Business**: Quick Replies, automated messages, message delivery reports, and promotional message handling across both E2EE and non-E2EE chats.
- Designed and solely maintained three internal libraries adopted across **15+ Zoho products** including Arattai and Zoho Cliq: a cross-organization **Media Editor**, a zero-dependency **PDF Viewer** with memory-efficient page rendering, and a **Markdown renderer** for Jetpack Compose.

Worldline Global Services – Java Developer Intern — Sep 2023 – Jan 2024

- Diagnosed and shipped fixes across transaction and integration modules in a large Java payment-processing backend.

Raptee Energy – Full Stack Developer Intern — Aug 2022 – May 2023

- Built and deployed the company's official marketing website end-to-end, from development to production.

PROJECTS

PulseSDK – Android Performance & Crash Monitoring SDK (GitHub)

- Architected a full-stack crash & ANR monitoring SDK using **Kotlin Multiplatform**, **Ktor backend** and **React dashboard**; implemented ANR detection via watchdog threads and breadcrumb tracking.
- Built a diagnostics pipeline with **HMAC-SHA256 request signing**, AI-powered crash analysis, and an **MCP server** enabling AI-assisted debugging workflows.

EDUCATION

B.E Electronics and Communication — **CGPA: 8.64**
Chennai Institute of Technology, Chennai, Tamil Nadu — Sep 2020 – Jun 2024

ACHIEVEMENTS

- **CliqTrix'24 (Zoho)** – Internship Winner, one of 14 finalist teams selected in an all-India collegiate hackathon.
